### "Doctor Faces Inquisition over Gay Health Comments" By Bob Unruh

<http://www.wnd.com/2015/10/doctor-faces-inquisition-over-gay-health-comments/>

Go to the above link to read the whole disturbing story about silencing reports on the health risks associated with homosexual activity.

*The board of directors of Boston's Beth Israel Deaconess Medical Center will hold a hearing in the case of a veteran medical expert who was dismissed for citing federal government statistics about the dangers of homosexual activity. Dr. Paul Church had been on the staff of the Boston hospital for nearly 30 years before his removal earlier this year... His offense? Citing the government statistics showing that the "gay" sex lifestyle poses deadly health risks.*

*"It is incredible to think they would be able to silence me and revoke my ability to be on the staff as a result of my raising valid health concerns over a risky lifestyle," he said.... "two-thirds of all new HIV/AIDS infections in the U.S. are the result of men having sex with men. Fifty percent of 'gay' men will be infected with HIV by age 50. Those numbers are out there and they are staggering," he said.*

*The statistics come from the federal Centers for Disease Control.*
